MULTI-SIDED

DIRECT VENT GAS FIREPLACES

HEAT & GLO®

AMBIANCE FROM MORE ANGLES

A

E

MULTI-SIDED

Enjoy the power of fire in dramatic new ways. Divide a space with elegance. Warm up a dim corner. Add architectural interest to any floor plan. Multi-sided gas fireplaces make it all possible.

ESCAPE ^A

The best fire. The cleanest look. And an authentic masonry appearance. Escape to warmth and comfort from two sides, with this captivating traditional focal point. With virtually invisible, anti-reflective glass and micro-screen mesh it creates an experience so real, friends may just try and add a log to the fire. Operating your fireplaces is simple, smart and safe with IntelliFire™ Touch.

SEE-THROUGH ^B

These stunning see-through fireplaces allow you to add architectural interest and ambiance to multiple rooms in a creative new way. One fireplace, two rooms of enjoyment. Multiple personalization options let you bring your vision to life. Opt for modern drama, authentic masonry, or somewhere in between. Operating your fireplaces is simple, smart and safe with IntelliFire Touch.

CORNER ^C

Add architectural interest to your space and enjoy the power of fire in creative new ways with this stunning two-sided gas fireplace. Operating your fireplaces is simple, smart and safe with IntelliFire Touch.

METRO SEE-THROUGH ^D

The compact and efficient METRO See-Through fits where other fireplaces don't. Think about different placements on the wall, or in a secondary or unique space.

PIER ^E

Add architectural interest to your space and enjoy the power of fire in creative new ways with these stunning three-sided gas fireplaces. Multiple personalization options let you bring your vision to life. Opt for modern drama, authentic masonry, or somewhere in-between. Operating your fireplaces is simple, smart and safe with IntelliFire Touch.

U.S. EFFICIENCIES

Steady State - Since most homeowners use their fireplaces for an extended time while they are in the room, Steady State measures how efficiently your fireplace converts fuel to heat once it is warmed up and running in a “steady state”.

AFUE - AFUE rating is more typically used with appliances, like your furnace, that continually cycle on and off to maintain a constant temperature.

RATING	ESCAPE-ST	ST-36TR/TRB	ST-55OT/ METRO SEE-THROUGH	PIER-36TR/TRB	L/RCOR-DV36IN
STEADY STATE	69.3%	72%	74%	75%	72%
AFUE	60.5%	59%	47%	68%	59%

CANADA EFFICIENCIES

EnerGuide (CSA P.4.1-15) - EnerGuide is a rating used in Canada to measure annual fireplace efficiency.

RATING	ESCAPE-ST	ST-36TR/TRB	ST-55OT/ METRO SEE-THROUGH	PIER-36TR/TRB	L/RCOR-DV36IN
ENERGUIDE (CSA P.4.1-15)	62.5%	58%	51%	58%	54%

MULTI-SIDED TECHNOLOGIES

**INTELLIFIRE IGNITION SYSTEM**

The IntelliFire Ignition System (IPI) is an advanced intermittent pilot ignition system. IPI constantly monitors ignition, ensures safe functioning and conserves up to \$10/month in energy costs.

**INTELLIFIRE TOUCH**

IntelliFire Touch is the most advanced and intuitive IntelliFire system, making operating your fireplace simple, smart and safe. Select the wireless wall switch or touchscreen remote control for the solution that fits your life.

**DIRECT VENT TECHNOLOGY**

With direct vent fireplaces and inserts, 100% of combustion exhaust and fumes are removed from your home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality.

**POWER VENTING TECHNOLOGY**

Fireplaces aren't just for exterior walls. A fan-powered accessory with slim venting can zigzag throughout your home—up, down, over or under—making it possible to install a gas fireplace virtually anywhere. This ensures safe fireplace operation and the best flames. Check with your local hearth professional to determine if your home or fireplace could benefit from power venting technology.

**LED EMBER BED**

Add an extra layer of dimension and light to your fire. Realistic illuminated LED embers let you enjoy the ambiance, with or without the fire.

**FADE-RESISTANT BLACK GLASS PANELS**

A clean look that reflects the fire and never gets dull. Just like this black glass interior. It's hot. And looks that way, too. For the life of your fireplace.

**HEAT MANAGEMENT**

Bring the warmth from your fireplace to the rest of your home, up to 20 feet away. Heat management technology can redirect up to 50% of the heat to another area, also reducing wall temperatures above the fireplace. Choose between a **Heat-Zone kit** to transfer heat where you want it, or utilizing your existing furnace ductwork with a **Heat Duct kit**.

Draw heat from your fireplace and direct it outside, up to 25 feet away. When a **Heat Out kit** is run continuously on high, it can redirect up to 40% of the heat off the fireplace, also reducing wall temperatures above the fireplace.

Dimensions shown are in inches. Reference dimensions only. We recommend measuring individual units at installation. Assumes the use of 1/2" Sheetrock. NOTE: Non-combustible material is allowed over this dimension. Make sure you do NOT cover the decorative door opening.

Refer to installation manual for detailed specifications on installing this product. Heat & Glo reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Pictures in this brochure are not true representation of the fireplace, flames and/or finishes.
