THE ISOKERN VENT-FREE SERIES (GAS ONLY)

Fire knows no bounds. Neither should fireplaces. The Vent-Free Series can be installed in less traditional areas of your house, such as under a window or within an entertainment area. With its large finished openings and double-sided/see-through availability, the Vent-Free Series can be placed in any new home or remodeling design. And, like all of the other modular fireplaces in the Isokern product line, the Vent-Free Series can be installed in less than a day and is ideal for both indoor and outdoor fireplace installations. This fireplace can also be finished in any way you desire— brick, stone, stucco, tile or veneer.

THE VENT-FREE SERIES

Typical Vent-Free Dimensions 36, 42, 46

Model	A	B	C	Minimum Framing	Weight
